9kg 600 Series MultiWash, Anti-Bacterial Treatment

600 Series

White

Three loads, one session. Three independent drums run simultaneously or individually, in a 9kg front loader with two specialist drums that fits under a standard bench.

- Three independent washers for true laundry separation
- Anti-Bacterial Treatment (ABT) helps maintain a hygienic wash environment
- Smart Dose and Essence Wash for less detergent guesswork and waste
- Express 15 for loads that need a quick turnaround
- Dedicated stain settings to target common marks like blood, sweat, and oil

DIMENSIONS

Height	**850 mm**
Width	**595 mm**
Depth	**604 mm**

FEATURES & BENEFITS

Wash small. Wash large. All at once.

A new way to do laundry. The MultiWash fits three independently operating drums in one under-bench design. Run one, two or all three drums as needed, each at its own temperature, from a single water connection. So everyday essentials, delicate pieces or smaller loads can be cared for separately, all at once.

Fits right at home

At a standard 850mm height, it's designed to fit under your bench, making it easy to bring more laundry power into the space you already have. Big on innovation, easy to live with, and made to feel right at home.

Get detergent right in every load without measuring

What's the right amount of detergent? Smart Dose takes care of it for you, across every wash and every drum. Simply fill the compartments with detergent and softener for items like delicates, sportswear or baby clothes, and the washer handles the rest. It calculates the right dose for the selected drum and program, while Essence Wash pre-mixes detergent with water before it enters the drum. With enough capacity for up to 29 washes* before the next refill, it's one less thing on your laundry list. *Based on internal testing using summed compartment volume in the main drum at a 4kg load (average NZ load size); number of washes varies by load size and applies across all cycles that use detergent.

Multi-hygiene care for the whole family

To care for clothes properly, the wash environment matters too. Anti-Bacterial Treatment (ABT) in the gasket of all three drums helps keep key areas hygienic between washes, while the dedicated Drum Clean cycle supports regular machine care. Together, they help maintain a cleaner drum environment over time.

Different loads, different care

No more choosing which load goes first. With specialist cycles across all three drums, you can care for bedding, hand-wash wool, infantwear and delicates at the same time. Each cycle adjusts heat, movement, water and time to suit the load, so different items can run together without compromising on care.

Control all three with ease

Intuitive controls across the main drum and smaller drums make it easier to manage mixed laundry. Temperature, spin and rinse can be adjusted independently, so every load gets the settings it needs.

Built for trusted performance

With three dedicated direct drive motors, each drum gets its own power and control. Attached directly to the drum with no belt and fewer moving parts, these motors help deliver quieter, smoother and more efficient care over time. It's the reliable engineering you expect from the world's number one major appliance brand for 17 consecutive years*. *Source Euromonitor International Limited; Consumer Appliances 2026ed, % unit share, 2025 volume sales data. Major Appliances category is the sum of dishwashers, home laundry appliances, large cooking appliances, microwaves and refrigeration appliances. Volume sales refers to sales in retail channel, builder merchants and construction channel.
