## FEATURES & BENEFITS

### Ultra Sense Technology

Ultra Sense technology is designed to prevent under or over drying bulky items, like puffer jackets or duvets, by sensing moisture levels inside the load and on the surface.

### Ultra Reverse Drum

Designed to reduce tangles and dry more evenly, the drum changes rotation direction every four minutes while continuously circulating warm air.

### Refresh and Ready-to-Wear

The short Refresh cycle with steam uses i-Refresh Pro technology to release steam and warm air into the drum. It's great for refreshing and reducing wrinkles in clothes that have been folded or stored, so they're ready to wear right away.

### Triple Variable Speed Technology

With variable speed technology controlling the drum, fan and compressor, drying conditions automatically adapt for every load. It fine tunes the temperature, drum movement and air flow rate for every cycle.

### Styled to Match

This Heat Pump Dryer has been designed to pair with our matching Front Load Washing Machine - with a sleek glass door, intuitive TFT display, drum light and pillow drum for gentle drying.

### Gentle Care

Care for your most delicate woollens with our Woolmark Blue certified Wool cycle, designed specifically for hand-wash only wool items. Our new folding drying rack is an easy solution for items that need a little extra care in the dryer.

### Smart Control

With the SmartHQ™ app and Wi-Fi connectivity, you're in control - anytime, anywhere. Once connected, start or stop your laundry cycles and get timely alerts on your smartphone once your washing is done.
