

Haier

More Creation, More Possibilities

Low current, high performance

Haier induction cooking without rewiring your kitchen*

Why low current?

For existing gas and ceramic users, installing a traditional induction cooktop often requires electrical rewiring in older homes due to the higher power demands and a 32-amp circuit or three-phase upgrade.

Haier offers low current induction cooktops that can use your existing home wiring*, efficiently distributing energy to different parts of the cooktop.

With a 19.1A rated current and 4.4kW power, this cooktop has been designed to support efficient and cost-effective installations.

How does it work?

Low current induction cooktops use power sharing technology to distribute energy efficiently across multiple cooking zones. This is achieved by prioritising power distribution to the cooking zone set to the highest power level, while limiting power drawn to others.

Example configuration of power distribution across zones

*Specific electrical situations may vary. Consult a licensed electrician. Standard current models HCI905TB4, HCI604FTB4 and HCI604TB3 also available.

Haier

More Creation, More Possibilities

Features and benefits

Rapid heating for busy lives

Your induction cooktop heats up rapidly with instant response, precise control, and a boost function for when you're in a rush.

Your safety in mind

The induction cooktop remains cool-to-touch until a pot or pan is placed on the surface, for safety in your kitchen.

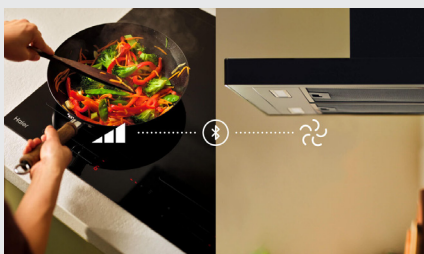

Energy efficiency

Your induction cooktop only heats when cookware is placed on it, so less heat is wasted making it more energy-efficient than gas or electric cooking.

Easy cleaning

Cleaning is easy thanks to a cooktop that stays cool around your cookware, avoiding baked-on spills.

Hood to Hob compatibility

This cooktop features linked hood to hob capability, allowing you to pair it with a compatible Haier rangehood via Bluetooth.*

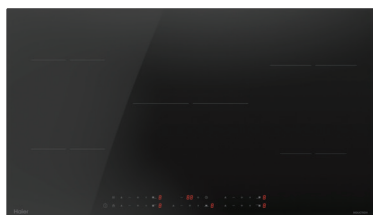

Flexible cooking with Flexi Zone

Pair two zones to make a large cook surface. Make gravy in a roasting dish, sear a large cut of meat or grill vegetables on a griddle.*

90cm | 300 Series Induction Cooktop, 5 Zone, Low Current

HCI905TPB4

Black Glass

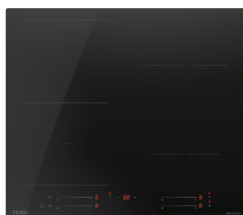

H 60mm W 900mm D 520mm

- Low current induction
- Intuitive touch controls
- Easy cleaning

60cm | 500 Series Induction Cooktop, 4 Zone, Flexi Zone, Low Current

HCI604FTP4
