Haier

Thank you for purchasing a Haier Product.

Please read these instructions carefully before using this appliance. The instructions contain important information which will help you get the best out of the appliance and ensure safe and proper installation, use and maintenance.

Keep this manual in a convenient place so you can always refer to it for the safe and proper use of the appliance.

If you sell the appliance, give it away, or leave it behind when you move house, make sure you also pass this manual so that the new owner can become familiar with the appliance and safety warnings.

Before switching on the appliance for the first time read the following safety hints!

WARNING!

Before first use

- ▶ Make sure there is no transport damage.
- ▶ Make sure all transport bolts are removed.
- ▶ Remove all packaging and keep out of children's reach.
- ▶ Handle the appliance always with at least two persons because it is heavy.

Daily use

- ▶ This appliance is not intended for use by persons (including children) with reduced physical, sensory or mental capabilities, or lack of experience and knowledge, unless they have been given supervision or instruction concerning use of the appliance by a person responsible for their safety.
- ▶ Children should be supervised to ensure that they do not play with the appliance.
- ▶ Children shall not play with the appliance.
- ▶ Do not let children or pets come close to the appliance when the door is open.
- ▶ Store washing agents out of reach of children.
- ▶ Pull up zips, fix loose threads and take care for small items to prevent laundry from being entangled. If necessary, use an appropriate bag or net.
- ▶ Do not touch or use the appliance when barefoot or with wet or damp hands or feet.
- ▶ Do not cover or encase the appliance during operation or afterwards to allow any moisture or dampness to evaporate.
- ▶ Do not place heavy objects or sources of heat or damp on top of the appliance.
- ▶ Do not use or store flammable detergent or dry cleaning agent in close vicinity to the appliance.
- ▶ Do not use any flammable sprays in close vicinity to the appliance.
- ▶ Do not wash any garments treated with solvents in the appliance without having dried them previously in the air.

**WARNING!****Daily use**

- ▶ Do not remove or insert the plug in the presence of flammable gas.
- ▶ Do not hot wash foam rubber or sponge-like materials.
- ▶ Do not wash any laundry which is polluted with flour.
- ▶ Do not open detergent drawer during any wash cycle.
- ▶ Do not touch the door during the washing process, it gets hot.
- ▶ Do not open the door if the water level is visibly over the porthole.
- ▶ Do not force the door to open. The door is fitted with a self-lock device and will open shortly after the washing procedure is ended.
- ▶ Switch off the appliance after each wash programme and before undertaking any routine maintenance and disconnect the appliance from the electrical supply to save electricity and for safety.
- ▶ Hold the plug, not the cable, when unplugging the appliance.

Maintenance / cleaning

- ▶ Make sure children are supervised if they carry out cleaning and maintenance.
- ▶ Disconnect the appliance from the electrical supply before undertaking any routine maintenance.
- ▶ Keep the lower part of the porthole clean and open door and detergent drawer if appliance is not in use to prevent odours.
- ▶ Do not use water spray or steam to clean the appliance.
- ▶ Replace a damaged supply cord only by the manufacturer, its service agent or similarly qualified persons in order to avoid a hazard.
- ▶ Do not try to repair the appliance by yourself. In case of repair please contact our customer service.

Installation

- ▶ The appliance should be placed in a well-ventilated place. Ensure a location which allows opening the door fully.
- ▶ Never install the appliance outdoors in a damp place, or in an area which may be prone to water leaks such as under or near a sink unit. In the event of a water leak cut power supply and allow the machine to dry naturally.

WARNING!

Installation

- ▶ Install or use the appliance only where the temperature is above 5 °C.
- ▶ Do not place the appliance directly on a carpet, or close to a wall or furniture.
- ▶ Do not install the appliance in direct sunlight or in the near of heat sources(e.g. stoves, heaters).
- ▶ Make sure that the electrical information on the rating plate agrees with the power supply. If it does not, contact an electrician.
- ▶ Do not use multi-plug adapters and extension cables.
- ▶ Make sure only the delivered electric cable and hose set are used.
- ▶ Make sure not to damage the electric cable and the plug. If damaged have it replaced by an electrician.
- ▶ Use a separate earthed socket for the power supply which is easy accessible after installation. The appliance must be earthed.
- ▶ Make sure the hose joints and connections are firm and there is no leakage.
- ▶ The new hose-sets supplied with the appliance are to be used and that old hose-sets should not be reused.
- ▶ The manual are suitable for 7.5kg, 8.5kg, 9.5kg washing machines. The applicable water pressure of the washing machine is 0.03MPa to 1MPa.

Intended use

This appliance is intended for washing machine-washable laundry only. Anytime follow the instructions given on the label of each garment label. It is designed exclusively for domestic use inside the house. It is not intended for commercial or industrial use.

Changes or modifications to the device are not allowed. Unintended use may cause hazards and loss of of all warranty and liability claims.

i Note:

Due to technical changes and different models, the illustrations in the following chapters may differ from your model.

2.1 Picture of appliance

Front (Fig. 2-1):

- | | |
|-------------------------------|-------------------|
| 1 Detergent / Softener drawer | 5 Washer door |
| 2 Work top | 6 Service flap |
| 3 Programme selector | 7 Adjustable feet |
| 4 Panel | |

Rear side (Fig. 2-2):

- | |
|------------------------|
| 1 Transportation bolts |
| 2 Back cover |
| 3 Back cover screws |
| 4 Power cord |
| 5 Water inlet valve |
| 6 Drain hose |

2.2 Accessories

Check the accessories and literature in accordance with this list (Fig.2-3):

- 1 "Power" button
- 2 Programme selector
- 3 Display
- 4 Detergent /Softener drawer
- 5 Function buttons
- 6 "Start/Pause" button

i Note : Acoustic signal

In following cases, an acoustic signal is no sounds by default:

- ▶ when pressing a button
- ▶ when turning the programmes selector
- ▶ at the end of programme

The acoustic signal can be selected if necessary ; see DAILY USE(see P18 7.13).

3.1 "Power" button

Touch this button (Fig. 3-2) gently to switch on, the display is shining, the indicator of the "Start/Pause" button is flashing. Press to turn the washer ON/OFF. Press and hold the Power button for five seconds until the power is turned on and the APP will be displayed on the screen to turn on the network function.

3.2 Programme selector

By turning the knob (Fig. 3-3) one of 14 programmes can be selected, related LED will light up, its default settings will be displayed.

3.3 Display

The display (Fig. 3-4) shows following information:

- ▶ Temp: Select washing temperature
- ▶ Soak: Select the number of soak
- ▶ Sanitise: Select sanitise function
- ▶ Speed up: Select different speed as needed
- ▶ ECO: Touch to select energy saving mode
- ▶ Spin Speed: Touch to select different speeds
- ▶ Error codes and service information
- ▶ Function buttons and "Start/Pause" button
- ▶ End time delay

3.4 Detergent drawer

Open dispenser drawer, the following components can be seen (Fig. 3-5):

- 1: compartment for powder or liquid detergent.
- 2: compartment for laundry aid products such as powder stain removers and soaking agents.
- 3: compartment for softener.
- 4: lock tab, press it down to pull out dispenser drawer.

The recommendation on the type of detergents is suitable for the various washing temperatures, please refer to the manual of detergent (see P11).

3.5 Function buttons

The function buttons (Fig. 3-6) enable additional options in the selected programme before programme starts. The related indicators are displayed.

By switching off the appliance or setting a new programme, all options are disabled.

If a button has multiple options, the desired option can be selected by pressing the button sequentially.

By touching the buttons, when it is in dull light, the function is unselected; when it is in bright light, the function is selected.

i Note: Factory settings

To get best results in each programme Haier has well defined specific default settings. If there is no special requirement default settings are recommended.

3.5.1-Function button "TEMP. "

Touch this button (Fig. 3-7) to change the washing temperature of the programme. If no value is illuminated (the display "-- °C") the water will not be heated.

3.5.2 Function button "Soak"

Touch this button (Fig. 3-8) to add a deep soak for to the wash. Select the desired time by press soak, increase soak time(30min,60min,90min, 120min).

3.5.3 Function button "sanitise"

Touch this button (Fig. 3-9), sanitisation turns on during wash and rinses. When selecting this function the temperature is set to 90°C. Sanitisation is by default ON in the Allergy programme.

3.5.4 Function button "Speed Up"

Touch the button (Fig. 3-11) to reduce washing time. When select " speed up" function, the weight of the laundry is less than the normal weight.

3.5.5 Function button "ECO"

Touch the button (Fig. 3-11) to Use the ECO option to save water and energy.

3.5.6 Function button "Spin Speed"

Touch this button (Fig. 3-12) to change the spin speed of the programme. If "0" is selected, the laundry will not spin.

3.6 "Start/Pause" button

Touch this button (Fig. 3-13) gently to start or pause the currently displayed programme. During programme setting and during programme run the LED above the button is shining, or if paused blinking.

3.7 Key lock

Press and hold Temp. and Soak combination keys for three seconds, the Keylock icon (Fig. 3-14) lights up. All buttons on control panel excepting the Power buttons are disabled. Repeat the operation to release the lock.

The display shows  (Fig. 3-15) if a button is pressed, when the key lock is activated.

3.8 Favourite

Choosing a programme and then start, touch button "Soak" and "Sanitise" (Fig. 3-16) for 3 seconds simultaneously to save personalised options for available programme, panel displays . To return to the default options for the cycle, press "Soak" and "Sanitise" for 3 seconds simultaneously, the display will show  (Fig. 3-17). to acknowledge the change.

Your appliance can be connected to your home wireless network and operated remotely using the app.

Getting started

Ensure your home WiFi network is turned on.

You will be given step by step guidance on both your appliance and mobile device.

It may take up to 10 minutes to connect your appliance.

On your mobile device:

1. Your product is WiFi connectable. Please visit the webpage below to download the app and find out more:
Australia <https://www.haier.com.au/smart>
New Zealand <https://www.haier.co.nz/smart>
2. Register and create an account.
3. Add your appliance and set up the WiFi connection.

Connecting to your home WiFi

When your machine is connected to WiFi successfully, the icon  lights up.

1. Press and hold **ECO** and **Speed up** combination keys for three seconds and the icon  lights up. **Remote Mode** is now enabled certain functions that your washer can now be accessed via the app. For disabling remote mode please touch again the two buttons, and the icon  goes out.

2. When turning off the washer, the Remote Mode will be automatically released. When the washer runs the programme in Remote Mode via app, the remote mode indicator  flashes every second.

* Water is not heated up.

1) Choose 90°C wash temperature only for special hygienic requirements.

2) Reduce detergent amount because programme duration is short.

3) Refresh tips: Refresh care clothing should be dry clothing, if the clothes are wet or soaked, please air dry before Refresh care, such as Refresh wet clothes directly, there is a risk of shrinkage, deformation; Please use soft cloth to protect the embroidery and decorations on the clothing surface in advance to avoid scratching the clothing surface; Refresh has the function of removing smell, please do not spray perfume, freshener, etc.; Please do not place too many clothes. Single care is recommended for best results; Not suitable for large, coated down jackets; suitable for small, short down jacket care.

The design and specifications are subject to change without notice for quality improvement purposes.

Check the energy label for energy consumption information.

The actual energy consumption may differ from the declared one according to local conditions.

The standard 60°C and 40°C cotton programmes are suitable to clean normally soiled cotton laundry. They are the most efficient programmes in terms of combined energy and water consumption for cotton laundry. Actual water temperature may differ from declared cycle temperature.

Note: Auto Weight

The appliance is equipped with a loading recognition. At low loading, energy, water and washing time will be reduced automatically in some programmes. The display shows "AU EG".

General information and tips:

Standard programme for the Energy and Water Labelling according to AS/NZS 2040.2

Cotton, 40 °C , 1400 rpm , others are default setting. When using standard program washing, please use 80% standard detergent.

Detergent dissolvent method: Dissolve the detergent first and pour the dissolved detergent into the machine when the main wash starts. The washing operation starts at the end of the first water filling.

7.1 Power supply

Connect the washing machine to a power supply (220V to 240V~/50Hz; Fig. 7-1). Please refer also to section INSTALLATION (see P29).

7.2 Water connection

- ▶ Before connecting check the cleanliness and clarity of the water inlet
- ▶ Turn on the tap (Fig.7-2).

Note: Tightness

Before use check for leakage in the joints between the tap and the inlet hose by turning on the tap.

7.3 Preparing laundry

- ▶ Sort out clothes according to fabric (cotton, synthetics, wool or silk etc.) and how to dirty they are (Fig. 7-3). Pay attention to the care labelling of washing labels.
- ▶ Separate white clothes from coloured ones. Wash coloured textiles first by hand to check if they fade or run.
- ▶ Empty pockets (keys, coins, etc.) and remove harder decorative objects (e.g. brooches).
- ▶ Garments without hems, delicates and finely woven textile such as fine curtains are to be put into a wash bag to care for this delicate laundry (hand or dry cleaning would be better).
- ▶ Close zippers, velco fastener and hooks, make sure the buttons are sewn on tightly.
- ▶ Place sensitive items like laundry without firm hem, delicate underwear and small items such as socks, belts, bras, etc. in a wash bag.
- ▶ Unfold large pieces of fabric such as bed sheets, bedspreads etc.
- ▶ Turn jeans and printed, decorated or color-intensive textiles inside out; possibly wash separately.

CAUTION!

Non-textile, as well as small, loose or sharp-edged items may cause malfunctions and damage of clothes and appliance.

Care chart

| Washing | | |
|--|--|---|
|  Washable up to 95°C normal process |  Washable up to 60°C normal process |  Washable up to 60°C mild process |
|  Washable up to 40°C normal process |  Washable up to 40°C mild process |  Washable up to 40°C very mild process |
|  Washable up to 30°C normal process |  Washable up to 30°C mild process |  Washable up to 30°C very mild process |
|  Wash by hand max. 40°C |  Do not wash | |
| Bleaching | | |
|  Any bleaching allowed |  Only oxygen/ non-chlorine |  Do not bleach |
| Drying | | |
|  Tumble drying possible normal temperature |  Tumble drying possible lower temperature |  Do not tumble dry |
|  Line drying |  Flat drying | |
| Ironing | | |
|  Iron at a maximum temperature up to 200 °C |  Iron at a medial temperature up to 150°C |  Iron at a low temperature up to 110 °C; without steam (steam ironing may cause irreversible damage) |
|  Do not iron | | |
| Professional Textile Care | | |
|  Dry cleaning in tetrachloroethene |  Dry cleaning in hydrocarbons |  Do not dry clean |
|  Professional wet clean |  Do not professional wet clean | |

7.4 Loading the appliance

- ▶ Put in the laundry piece by piece.
- ▶ Don't overload. Note the different maximum load according to programmes! Rule of thumb for maximum load: Keep six inches between load and drum top.
- ▶ Close the door carefully. Make sure that no pieces of laundry are pinched.

7.5 Selecting detergent

- ▶ Washing efficiency and performance is determined by used detergent quality.
- ▶ Use only machine wash approved detergent.
- ▶ If needed use specific detergents, e.g synthetic and woolen fabric .
- ▶ See tips for countertop detergent stickers.
- ▶ Do not use dry cleaning agents such as trichloroethylene and similar products.

Choose the best detergent

| Programme | Kind of detergent | | | | |
|------------|-------------------|--------|----------|---------|----------|
| | Universal | Colour | Delicate | Special | Softener |
| Cotton | L/P | L/P | - | - | o |
| Synthetic | - | L/P | - | - | o |
| Delicate | - | - | L/P | L/P | o |
| Towels | - | L | - | - | o |
| Refresh | - | - | - | - | - |

| Bedding | P | L/P | - | - | o |
| Express 15 | L | L | - | - | o |
| Bulky | L/P | L | - | - | o |
| Spin | - | - | - | - | - |
| Durable | L/P | L/P | - | - | o |
| Downloaded | L/P | L/P | - | - | o |

L = gel-/liquid detergent P = powder detergent O = optional - = no

If using liquid detergent, it is not recommended to activate the time delay.

We recommend by using:

- ▶ Laundry powder: 20°C to 90°C* (best use: 40-60°C)
- ▶ Color detergent: 20°C to 60°C (best use: 30-60°C)
- ▶ Wool/delicate detergent: 20°C to 30°C (best use:20-30°C)

* Choose 90 °C wash temperature only for special hygienic requirements.

* If you choose the water temperature 60°C or above,we would like to advise you to use less detergent.

* It is better to use less or free suds detergent powder.

7.6 Adding detergent

1. Slide out the detergent drawer.
2. Put the required chemicals into corresponding compartments (Fig. 7-4),
3. Push back the drawer gently.

i Note:

- ▶ Remove detergent residues before next wash cycle from the detergent drawer.
- ▶ Do not overuse detergent or softener.
- ▶ Please follow the instruction on the detergent package.
- ▶ Always fill the detergent just before the beginning of the wash cycle.
- ▶ Concentrated liquid detergent should be diluted before adding.
- ▶ Do not use liquid detergent if function "Delay" is selected.
- ▶ Carefully choose the programme settings according to the care symbols on all laundry labels and according to the programme table.

7.7 Switch on the appliance

Touch the "Power" button to switch on the appliance (Fig. 7-5). The LED of the "Start/Pause" button is flashing.

7.8 Select a programme

To get the best washing results, select a programme which fits the degree of soiling and sort of laundry type.

Turn the programme knob (Fig. 7-6) to select the right programme. Related programme LED lights up and the default settings are displayed.

i Note: Odour removal

Before first use we recommended to run programme "COTTON+90 °C+600rpm" with no load and small amount of detergent in washing agent compartment (2) or special machine cleaner to remove possibly corruptive residues.

7.9 Add individual selections

Select required options and settings (Fig. 7-7); refer to Control Panel.

7.10 Start wash programme

Touch "Start/Pause" button (Fig. 7-8) to start. The LED of the "Start/Pause" button stops flashing and lights up continuously. Appliance operates according to present settings. Changes are only possible by cancelling the programme.

7.11 Interrupt / cancel wash programme

To interrupt a running programme press gently "Start/Pause". The LED above the button is flashing. Press it again to resume operation.

To cancel a running programme and all its individual settings:

1. Touch "Start/Pause" button to interrupt the running programme.
2. Touch "Power" button for about 2 seconds to switch the appliance off.
3. Touch the "Power" button to turn on the appliance. No select speed and run programme Spin to drain water.
4. Select a new programme and start it.

7.12 After washing

Note: Door lock

- ▶ For safety reasons the door is locked during the washing cycle. It is only possible to open the door at the end of the programme or after the programme was cancelled correctly (see description above).
- ▶ In case of high water level, high water temperature and during spinning it is not possible to open the door; Lock is displayed.

1. At programme cycle end END is displayed.
2. The appliance switches off automatically.
3. Remove laundry as soon as possible to go easy on it and to prevent more wrinkling.
4. Turn off the water supply.
5. Unplug the power cord.
6. Open the door to prevent formation of moisture and odours. Leave it open while not used.

Note: Standby-mode / energy-saving mode

The appliance will go into stand-by mode after 2 minutes of inactivity. The display turns off to save energy. Resume operation by pressing the power button to turn product on.

7.13 Activate or deactivate the sounds

The sounds and signals can be deselected if necessary.

1. Switch on the appliance.
2. Select the Express 15 programme.
3. Touch the "Soak" button and "speed up" button at the same time for about 3 seconds. "BEEP ON" will be displayed and the buzzer will be activated. For activating the buzzer touch these two buttons at the same time again. "BEEP OFF" will be displayed.

Environmentally responsible use

- ▶ To achieve best use of energy, water, detergent and time you should use the recommended maximum load size.
- ▶ Do not overload (hand width clearance above laundry).
- ▶ For slightly soiled laundry select the Express 15 programme.
- ▶ Apply exact dosages of each washing agent.
- ▶ Choose the lowest adequate washing temperature-modern detergents are efficiently cleaning below 60°C.
- ▶ Raise default settings only due to heavy staining.
- ▶ Select max. spinning speed if a domestic dryer is used.

9.1 Cleaning the detergent drawer

Take always care there are no detergent residues. Clean the drawer regularly (Fig. 9-1):

1. Pull out the drawer until it stops.
2. Press the release button and remove the drawer.
3. Flush the drawer with water until it is clean and insert the drawer back in the appliance.

9.2 Cleaning the machine

- ▶ Unplug the machine during cleaning and maintenance
- ▶ Use a soft cloth with soap liquid to clean the machine case (Fig. 9-2) and rubber components.
- ▶ Do not use organic chemicals or corrosive solvents.

9.3 Water inlet valve and inlet valve filter

To prevent blockage of water supply by solid substances like lime clean regularly the inlet valve filter.

- ▶ Unplug the power cord and turn off the water supply.
- ▶ Unscrew the water inlet hose at the back (Fig. 9-3) of the appliance as well as on the tap.
- ▶ Flush the filters with water and a brush (Fig. 9-4).
- ▶ Insert the filter and install the inlet hose.

9.4 Cleaning the drum

- ▶ Remove accidentally washed items, especially metal parts such as pins, coins, etc. from the drum (Fig. 9-5) because they cause rust stains and damage.
- ▶ Use a non-chloride cleaner for removing rust stains. Observe the warning hints of the cleaning agent manufacturer.
- ▶ Do not use any hard objects or steel wool for cleaning.

9.5 Long periods of disuse

If the appliance is left idle for a longer period:

1. Pull out the electrical plug (Fig. 9-6).
2. Turn off water supply (Fig. 9-7).
3. Open the door to prevent formation of mould and odours. Leave door open while not used.

Before next usage check carefully power cord, water inlet and drain hose. Make sure everything is properly installed and without leaks.

9.6 Pump filter

Clean the filter once a month and check the pump filter for instance if the appliance:

- ▶ Doesn't drain the water.
- ▶ Doesn't spin.
- ▶ Cause unusual noise while running.

WARNING!

Scalding Risk! Water in the pump filter can be very hot! Before any action please ensure water has cooled down.

1. Turn off and unplug the machine (Fig. 9-8).
2. Push and open service flap (Fig. 9-9).
3. Provide a flat container to catch leach water (Fig. 9-10). Be prepared to catch large amounts of water.
4. Pull the drainhose out and hold its end above the container (Fig. 9-10).
5. Take the sealing plug out of the drainhose (Fig. 9-10).
6. After complete drainage close drainhose (Fig. 9-11), and push it back into the machine.
7. Unscrew and remove counter clockwise the pump filter (Fig. 9-12).
8. Remove contaminants and dirt (Fig. 9-13).

9. Clean carefully pump filter, e.g. using running water (Fig. 9-14).
10. Refix it thoroughly (Fig. 9-15).
11. Close service flap.

CAUTION!

- ▶ Pump filter sealing has to be clean and undamaged. If the lid is not properly tightened, water can leak.
- ▶ The filter must be in place, or it may lead to leakage.

Many occurring problems could be solved by yourself without specific expertise. In case of a problem please check all shown possibilities and follow below instructions before you contact an after sales service. See CUSTOMER SERVICE.

WARNING!

- ▶ Before maintenance, deactivate the appliance and disconnect the mains plug from the mains socket.
- ▶ Electrical equipment should be serviced only by qualified electrical experts, because improper repairs can cause considerable consequential damages.
- ▶ A damaged power cable should only be replaced by the manufacturer, its service agent or similarly qualified persons in order to avoid a hazard.

10.1 Information codes

Following codes are displayed only for information referring to the washing cycle. No measures must be performed.

| Code | Message |
|-----------|---|
| 1:25 | The remaining wash cycle time will be 1 hour and 25 minutes. |
| AUTO | Automatic load detection is working; only in some programmes. |
| End | The washing cycle is finished. The appliance shuts off automatically. |
| Lock | Door is closed because of high water level, high water temperature or spinning cycle. |
| bBEEP OFF | The sound is deactivated. |
| bBEEP ON | The sound is activated. |
| cLok | The keylock is activated. Deactivate to make changes to the selection. |
| App | The machine is in configuration for remote mode. |
| Add | The garment function is working. |
| dEF | Restore the default parameters for all programmes. |

10.2 Troubleshooting with display code

| Problem | Cause | Solution |
|-------------|--|--|
| CLr FLtr | <input checked="" type="checkbox"/> Drainage error, water is not fully drained within 6 minutes. | <input checked="" type="checkbox"/> Clean pump filter. <input checked="" type="checkbox"/> Check drain hose installation. |

9.3 Troubleshooting without display code

| Problem | Cause | Solution |
|--|---|--|
| Washing machine fails to operate. | <ul style="list-style-type: none"> Programme is not yet started. Door is not properly closed. Machine has not been switched on. Power failure. Key lock is activated. | <ul style="list-style-type: none"> Check programme and start it. Close the door properly. Switch the machine on. Check power supply. Deactivate child lock. |
| Washing machine will not be filled with water. | <ul style="list-style-type: none"> No water. Inlet hose is kinked. Inlet hose filter is blocked. Water pressure is less than 0.03 MPa. Door is not properly closed. Water supply failure. | <ul style="list-style-type: none"> Check water tap. Check inlet hose. Unblock inlet hose filter. Check water pressure. Close the door properly. Ensure the water supply. |
| Machine is draining while being filled. | <ul style="list-style-type: none"> Height of drain hose is below 80 cm. Drain hose end could reach into water. | <ul style="list-style-type: none"> Make sure that drain hose is properly installed. Make sure the drain hose is not in water. |
| Drainage failure. | <ul style="list-style-type: none"> Drain hose is blocked. Pump filter is blocked. Drain hose end is higher than 100 cm above floor level. | <ul style="list-style-type: none"> Unblock drain hose. Clean pump filter. Make sure that drain hose is properly installed. |
| Strong vibration while spinning. | <ul style="list-style-type: none"> Not all transportation bolts have been removed. Appliance has not being leveled. Machine load is not correct. | <ul style="list-style-type: none"> Remove all transportation bolts. Ensure solid ground and a leveled position. Check load weight and balance. |
| Operation stops before completing wash cycle. | <ul style="list-style-type: none"> Water or electric failure. | <ul style="list-style-type: none"> Check power and water supply. |
| Operation stops for a period of time. | <ul style="list-style-type: none"> Appliance displays error code. Problem due to load pattern. Programme performs soaking cycle. | <ul style="list-style-type: none"> Consider display codes. Reduce or adjust load. Cancel programme and restart. |

| Problem | Cause | Solution |
|---|---|---|
| Excessive foam in drum and or detergent drawer. | <input checked="" type="checkbox"/> Detergent is not a appropriate. <input checked="" type="checkbox"/> Detergent is too concentrated. | <input checked="" type="checkbox"/> Check detergent recommendations. <input checked="" type="checkbox"/> Dilute detergent. |
| Automatic adjustment of washing time. | <input checked="" type="checkbox"/> Washing programme duration will be adjusted. | <input checked="" type="checkbox"/> This is normal and doesn't affect functionality. |
| Spinning fails. | <input checked="" type="checkbox"/> Unbalanced of laundry. | <input checked="" type="checkbox"/> Redistribute load and run a spin program again. |
| Unsatisfactory washing result. | <input checked="" type="checkbox"/> Cycle was not selected for the soil level in the garments. <input checked="" type="checkbox"/> Detergent quantity was not sufficient <input checked="" type="checkbox"/> Maximum load has been exceeded. <input checked="" type="checkbox"/> Laundry was unevenly distributed in the drum. | <input checked="" type="checkbox"/> Select an other programme. <input checked="" type="checkbox"/> Choose an adequate detergent and dose according to the manufacturer specifications. <input checked="" type="checkbox"/> Reduce loading. <input checked="" type="checkbox"/> Loose the laundry. |
| Washing powder residues are on the laundry. | <input checked="" type="checkbox"/> Insoluble particles of detergent can remain as white spots on the laundry. | <input checked="" type="checkbox"/> Avoid choosing speed up or express cycles for heavily soiled garments. <input checked="" type="checkbox"/> Try to brush the points from the dry laundry. <input checked="" type="checkbox"/> Choose another detergent. <input checked="" type="checkbox"/> Try adding Soak functionality to the cycle. |
| Laundry has grey patches. | <input checked="" type="checkbox"/> Caused by fats such as oils, creams or ointments. | <input checked="" type="checkbox"/> Pretreat the laundry with a special cleaner. |

i Note: Foam formation

If too much foam is sensed during spin cycle, motor stops and drain pump will be activated for 90 seconds. If that elimination of foam fails up to 3 times, programme ends without spinning.

Should the error messages reappear even after the taken measures, switch off the appliance, disconnect the power supply and contact the customer service.

10.4 In case of power failure

The current programme and its setting will be saved. When power supply is restored operation will be resumed.

If a power failure cuts an operating wash programme door opening is mechanically blocked. To get out any laundry water level should not be seen through the door porthole. Danger of burns! Water level has to be lowered as described in "Pump filter". Not till then pull lever (A) beneath service flap (Fig.10-1) until door is unlocked by a gentle click. Afterwards refix all parts.

When the washing machine in a safe state (under the water level below the window along a certain distance, barrel temperature below 55 °C, the inner barrel did not turn), may unlock the doors of the machine operation.

11.1 Preparation

- ▶ Take the appliance out of the packaging.
- ▶ Remove all packaging material including protecting film on cabinet, polystyrene base, keep them out of childrens reach. While opening the package, water drops may be seen on plastic bag and porthole. This normal phenomenon results from water tests in the factory.

Note: Packaging disposal

Keep all packaging materials out of children's reach and dispose them in an environmentally friendly manner.

11.2 OPTIONAL: Install noise reduction pads

1. When opening the shrink package, you will find four noise reduction pads. These are used for reducing noise (Fig. 11-1).
2. Lay the washing machine down to its side, porthole pointing upwards, bottom side towards operator.
3. Take out the noise reduction pads and remove the double-sided adhesive protective film; paste around the bottom ; the noise reduction pads under the washing machine cabinet as shown in Figure 3 (two longer pads in position 1 and 3, two shorter pads in position 2 and 4). Finally set the machine upright again.

11.3 Dismantle the the transportation bolts

The transport protection on the rear side is designed for clamping anti-vibration components inside the appliance during transportation to prevent inner damage. All elements (T1-T4, Fig 11-2) must be removed before use.

1. Remove all 4 bolts (T1 - T4) (Fig. 11-3).

General information and tips:

Keep the transportation bolts in a safe place for later use. If the machine is to be moved to another location, replace transportation bolts contrariwise to prevent damage.

2. Fill the transportation bolt holes with blanking plugs (Fig. 11-4).

11.4 Moving the appliance

If the machine is to be moved to a distant location, replace the transportation bolts removed before installation to prevent damage: The assembly takes place in reverse order.

11.5 Aligning the appliance

Adjust all feet (Fig. 11-7) to achieve a complete level position. This will minimize vibrations and thus noise during use. It will also reduce wear and tear. We recommend to a spirit level for adjustment. Floor should be as stable and flat as possible.

1. Loose the locknut (1) by using a wrench.
2. Adjust the high by turning the foot (2).
3. Tighten lock ut (1) against the housing.

11.6 Drain Water Connection

Fix the water drain hose properly to the piping. The hose has to reach at one point a height between 80 and 100 cm above the appliance bottom line! If possible keep always drain hose fixed to the clip at the appliance back.

WARNING!

- ▶ Use only the supplied hose set for the connection.
- ▶ Never reuse old hose sets!
- ▶ Only connect to cold water supply.
- ▶ Before connection, check whether the water is clean and clear.

Following connections are possible:

11.6.1 Drain hose to sink

- ▶ Hang the drain hose with the U-support over the edge of a sink with adequate size (Fig. 10-8).
- ▶ Protect the U-support sufficiently against slipping.

11.6.2 Drain hose to waste water connection

- ▶ The internal diameter of the stand pipe with vent-hole must be minimum 40 mm.
- ▶ Put the drain hose for 80-100 mm in the wastewater pipe.
- ▶ Attach the U-support and secure it (Fig. 10-9).

11.6.3 Drain hose to sink connection

- ▶ The junction must lie above the siphon.
- ▶ A spigot connection is usually closed by a pad (A). That must be removed to prevent any disfunction (Fig. 10-10).
- ▶ Secure the drain hose with a clamp.

CAUTION!

- ▶ The drain hose should not be submerged in water and should be securely fixed and leak-free. If the drain hose is placed on the ground or if the pipe is at a height of less than 80 cm, the washing machine will continuously drain while being filled (self-siphoning).
- ▶ Drain hose is not to be extended. If necessary contact after sales service.

11.7 Fresh Water Connection

Make sure that the gaskets are inserted.

1. Connect the water inlet hose with the angled end to the appliance (Fig. 11-11). Tighten the screw joint by hand.
2. The other end connect to a water tap with a 3/4" thread (Fig. 11-12).

11.8 Electrical Connection

Before each connection check if:

- ▶ power supply, socket and fusing are appropriate to the rating plate.
- ▶ the power socket is earthed and no multi-plug or extension are used.
- ▶ the power plug and socket are strictly according.

Put the plug into the socket (Fig. 11-13).

WARNING!

- ▶ Ensure always that all connections (power supply, drain and fresh water hose) are firm, dry and leak free!
- ▶ Take care these parts are never to be crushed, kinked, or twisted.
- ▶ If the supply cord is damaged, it must be replaced by the service agent (see warranty card) in order to avoid a hazard.

12.1 Additional technical data

| | HWF75AN1 | HWF85AN1 | HWF95AN1 |
|-----------------------|-----------------|----------|----------|
| Voltage in V | 220-240 V~/50Hz | | |
| Current in A | 10 | | |
| Max power in W | 1900 | | 1900 |
| Water pressure in MPa | 0.03≤P ≤1 | | |
| Net weight in kg | 70 | 70 | 71 |

12.2 Product dimensions

| PRODUCT DIMENSIONS | HWF95AN1 | HWF85AN1 | HWF75AN1 |
|--|----------|----------|----------|
| A Overall height of product mm | 850 | 850 | 850 |
| B Overall width of product mm | 595 | 595 | 595 |
| C Overall depth of product (To main control board size) mm | 600 | 550 | 550 |
| D Depth of door open mm | 1134 | 1084 | 1084 |
| E Minimum door clearance to adjacent wall mm | 260 | 260 | 260 |

Note: The exact height of your washer is dependent on how far the feet are extended from the base of the machine. The space where you install your washer needs to be at least 40mm wider and 20mm deeper than its dimensions.

We recommend our Haier Customer Service and the use of original spare parts.
If you have a problem with your appliance, please first check section TROUBLESHOOTING.

If you cannot find a solution there, please contact:

- ▶ your local dealer.
- ▶ the Service & Support area at www.haier.com where you can find telephone numbers and FAQs and where you can activate the service claim.

To contact our Service, ensure that you have the following data available.
The information can be found on the rating plate.

Model _____ Serial No. _____

Also check the Warranty Card supplied with the product in case of warranty.

For general business enquiries please contact our Customer Care Centre according to Warranty Card.

For more information please refer to www.haier.com.
